

# Dr. Dana Nail Renewal System

## ALL YOU NEED TO KNOW

### BENEFITS

- \* Clinically proven to leave your nails looking and feeling healthy, smooth, strong and shiny.
- \* Three easy steps to exfoliate and hydrate your nails without ever leaving the house – all in just 10 minutes.
- \* Developed by a board-certified dermatologist specialising in nailcare. Dr. Dana Stern knows her stuff.
- \* Hands. Feet. It works great on both.
- \* Botanical ingredients to help hydrate and condition your nails and cuticles in step 03.

### USAGE

#### Step 01: Glycolic Acid Prep for Nails

This is the first step in your adventure with Dr. Dana – featuring Glycolic Acid for that essential nail exfoliation. Ensure that your nails are dry, clean, and unpolished. Twist the pen – this might take a few tries the first time but keep at it – and coat the droplet evenly across the nails of one hand. Repeat for your other hand. Let it sink in completely – the product itself, and how awesome it is – then move on to Step 02. Use once per week.

#### Step 02: Perfect grit priming wand

This multi-tasking wand has three levels of roughness to prime your nails, removing any damaged surface nail cells and setting you up for Step 3. Brush your nails with Surface 01 two to five times until you notice a fine powder. Repeat with Surface 02, and then finish up with Surface 03, pressing harder and sweeping back and forth to get those nails glowing. Use surface 01 and 02 just once per week. Use surface 03 no more than once per day to boost shine.

#### Step 03: Deep Hydrating Formula for Nails & Cuticles

You're almost there! This innovative gel-oil is made with natural ingredients to leave your nails looking healthy, shiny and strong. Just like in step 1, twist the silver pen and brush the product across the entire nail – share the love with the surrounding skin and the cuticles as well (you can call them cute-icles after this). Repeat this step to your heart's content throughout the week (no more than once per day), then take to the streets and show 'em off. Doctor's orders.

### INGREDIENTS

#### Step 01: Glycolic Prep For Nails

Aqua, Glycolic Acid, Sodium Hydroxide, Sodium Oxide, Glycerin, Xanthan Gum, Aloe Barbadensis Leaf Juice Powder, Taraxacum Officinale Extract, Pyrus Malus Fruit Extract, PEG-12 Dimethicone, Ethylhexylglycerin, Caprylyl Glycol, T-Butyl Alcohol, Hexylene Glycol, Ammonium Acryloyldimethyltaurate/VP Copolymer, Citrus Grandis Peel Oil, Pyruvic Acid, Phenoxyethanol, Chlorphenesin, Benzoic Acid, Sorbic Acid, Limonene.

#### Step 03: Deep Hydrating Formula For Nails & Cuticle
