## LEARN MORE ABOUT IT

### What are bioadaptive botanicals?

Bioadaptive botanicals are plants that thrive in extreme climates thanks to their adaptive properties. Our extracts use these special properties to help your skin to increase its ability to adapt to its changing and unique environment, helping it bounce back from — and gain resiliency to — life's daily stressors.

### Where does Nutricentials Celltrex Always Right Recovery Fluid fit in my skincare routine?

Nutricentials Celltrex Always Right Recovery Fluid is a serum, so you should apply it after toning and before moisturising in the morning and evening.

### How does Nutricentials Celltrex Always Right Recovery Fluid help my skin bounce back from environmental stressors?

Your skin takes a beating throughout the day, but the bioadaptive botanical extracts in Nutricentials Celltrex Always Right Recovery Fluid are designed to help it bounce back from life's daily stressors. They are taken from unique plants that can thrive in even the harshest conditions. These adaptive benefits help your skin rebound during the day, or when it needs it the most.

### How does HydraFlex work?

The HydraFlex Blend adapts to your changing environment to give your skin the right hydration no matter where you are. This is because it's amphiphilic, which means that it contains both water- and oil-loving components. The water-loving portion retains water on the skin, while the oil-loving part repels it. This allows the blend to auto-adapt to your changing environment, drawing in moisture and limiting evaporation as needed to allow your skin to have just the right amount of hydration in every situation.

### Can I use Nutricentials Celltrex Always Right Recovery Fluid in the morning and at night?

Absolutely! By adding Nutricentials Celltrex Always Right Recovery Fluid to both your morning and evening routines, you'll improve the amazing benefits to your skin.

### What does a non-comedogenic formula mean for my skin?

Non-comedogenic means that the formula won't clog the pores. Even those with oilier skin won't struggle

here. There's no need to fear trying out richer textures – they're suitable for you, no matter your skin type. All of our leave-on products have been tested for comedogenicity to ensure that they do not clog pores.

### How were the ingredients chosen?

Nutricentials is inspired by nature. The magic of plant extracts, like our bioadaptive botanicals, is a crucial part of this product range. Our science is there to support these ingredients. Whether it comes from the earth or from the lab, every ingredient is there for a reason. We design every Nu Skin product to meet not just our own high standards, but also the demands of those who use them.

### How does Nutricentials support Nu Skin's commitment to becoming more sustainable?

Nutricentials bottles are made from 100% post-consumer recycled plastic, while the tubes are made with 34–35% post-consumer recycled plastic. Please check how to best recycle the bottles and jars in your area where possible. By purchasing Nutricentials, you're joining us in taking an active, engaged stride to ensure the future is bright for both the planet and each of us.
